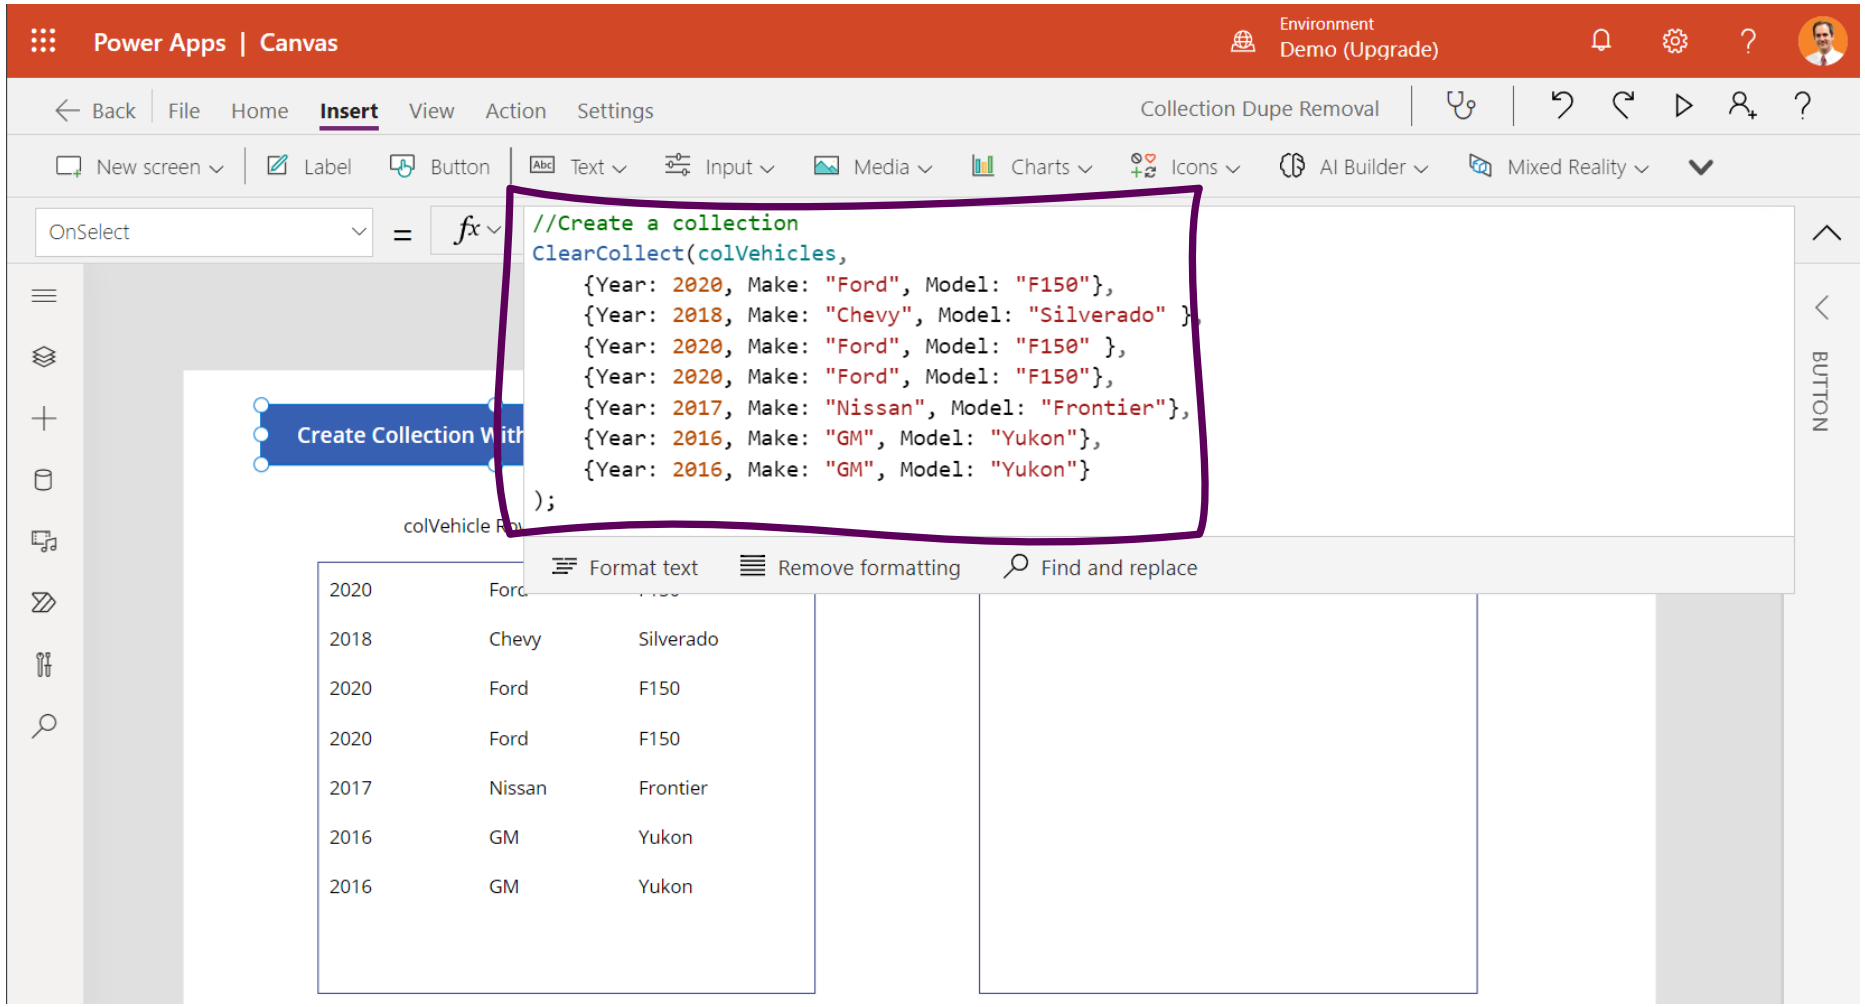
# Monthly Community Quick Tip

Matthew Devaney

"Remove duplicate rows in collections with one line of code!"

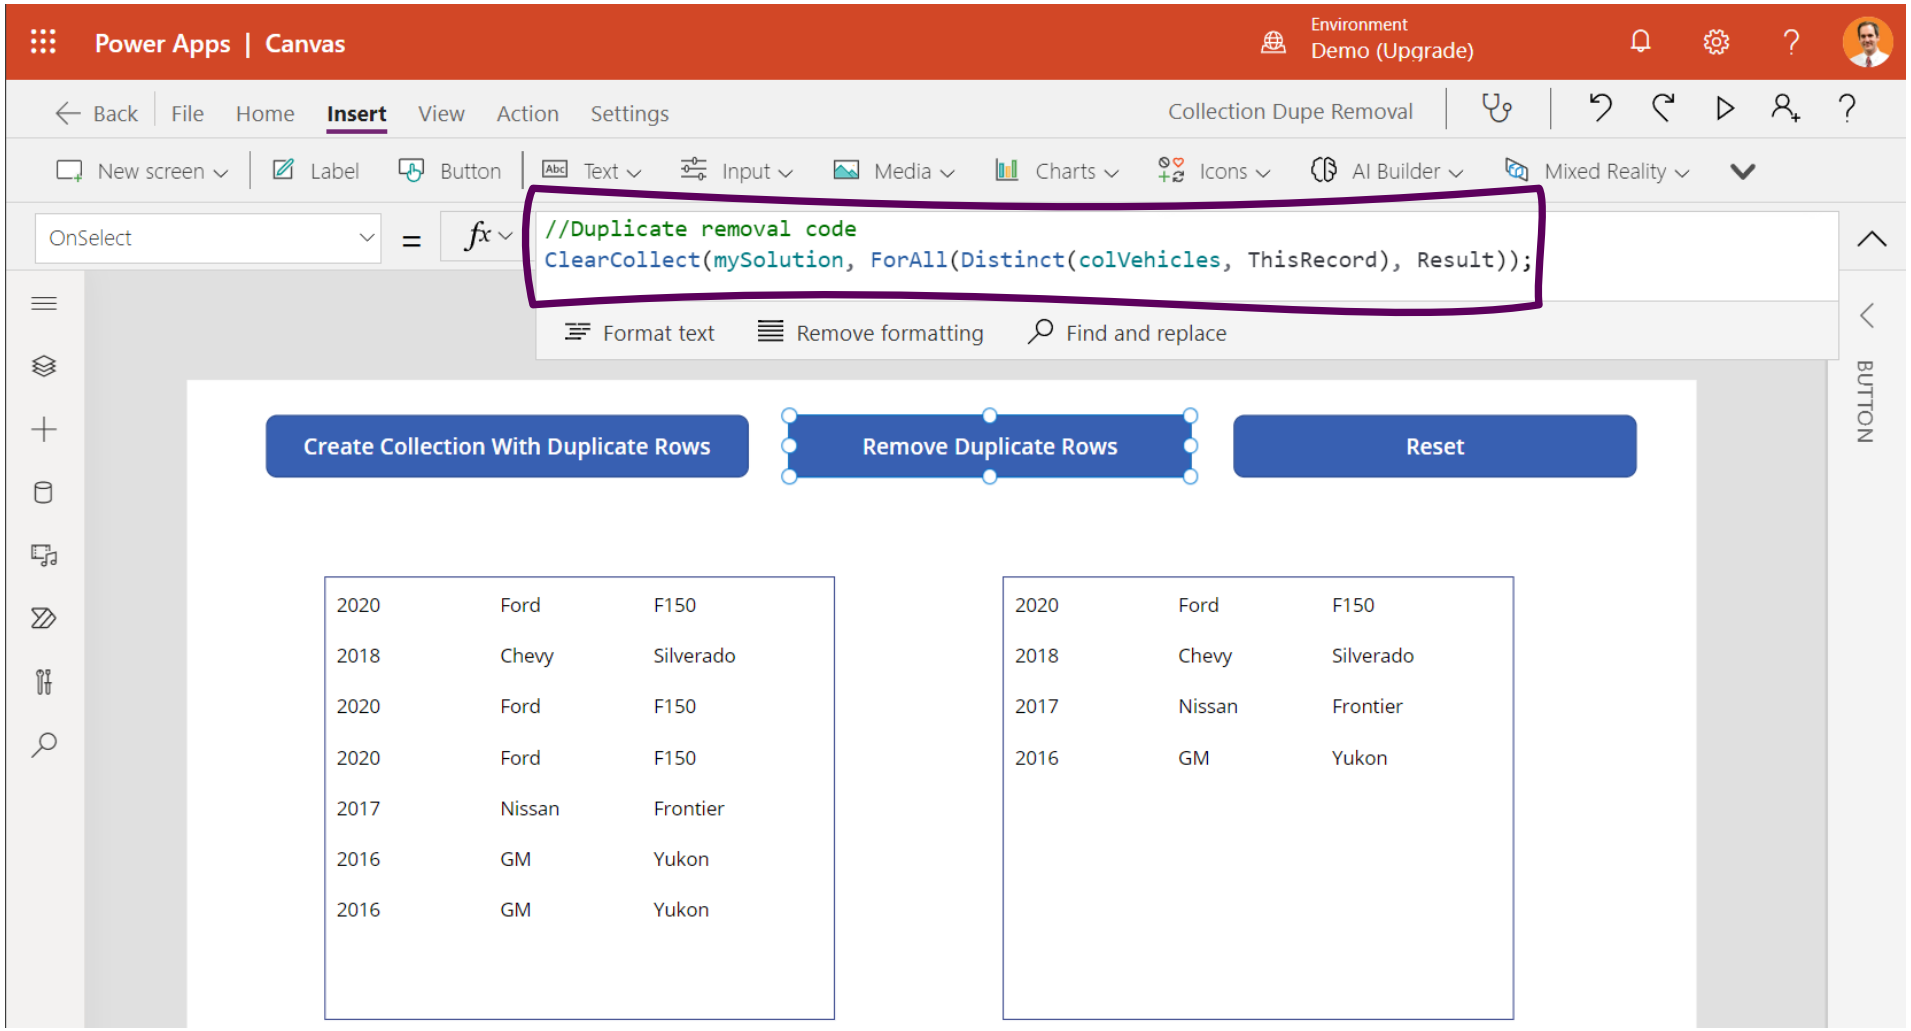
# Monthly Community Quick Tip

## Remove duplicate rows in Collections with one line of code!



# Monthly Community Quick Tip

## Remove duplicate rows in Collections with one line of code!



# Monthly Community Quick Tip

## Remove duplicate rows in Collections with one line of code!

Here's how it works:

```
ClearCollect(mySolution, ForAll(Distinct(colVehicles, ThisRecord), Result));
```

1. The Distinct function returns a one-column table of unique values for a field.

2. When we use ThisRecord instead of a column name, it results in a one-column table of unique records.

3. Then, we loop over the one column table using ForAll to extract the rows into a multiple-column table.

# Monthly Community Quick Tip

## Remove duplicate rows in Collections with one line of code!

## Learn More!

## Share your Community Quick Tips!

https://aka.ms/PPCCDemoRequest

# Optional picture time!

Turn your video on and we'll grab a Together Mode picture with everyone willing to participate.

We are together in this as a community!

***By enabling your camera for the picture, you'll give us the permission to share your picture in social media.***
