Agenda

What is Fluent UI

What is different with Fluent UI 9

Demo

Code

What is Fluent UI?

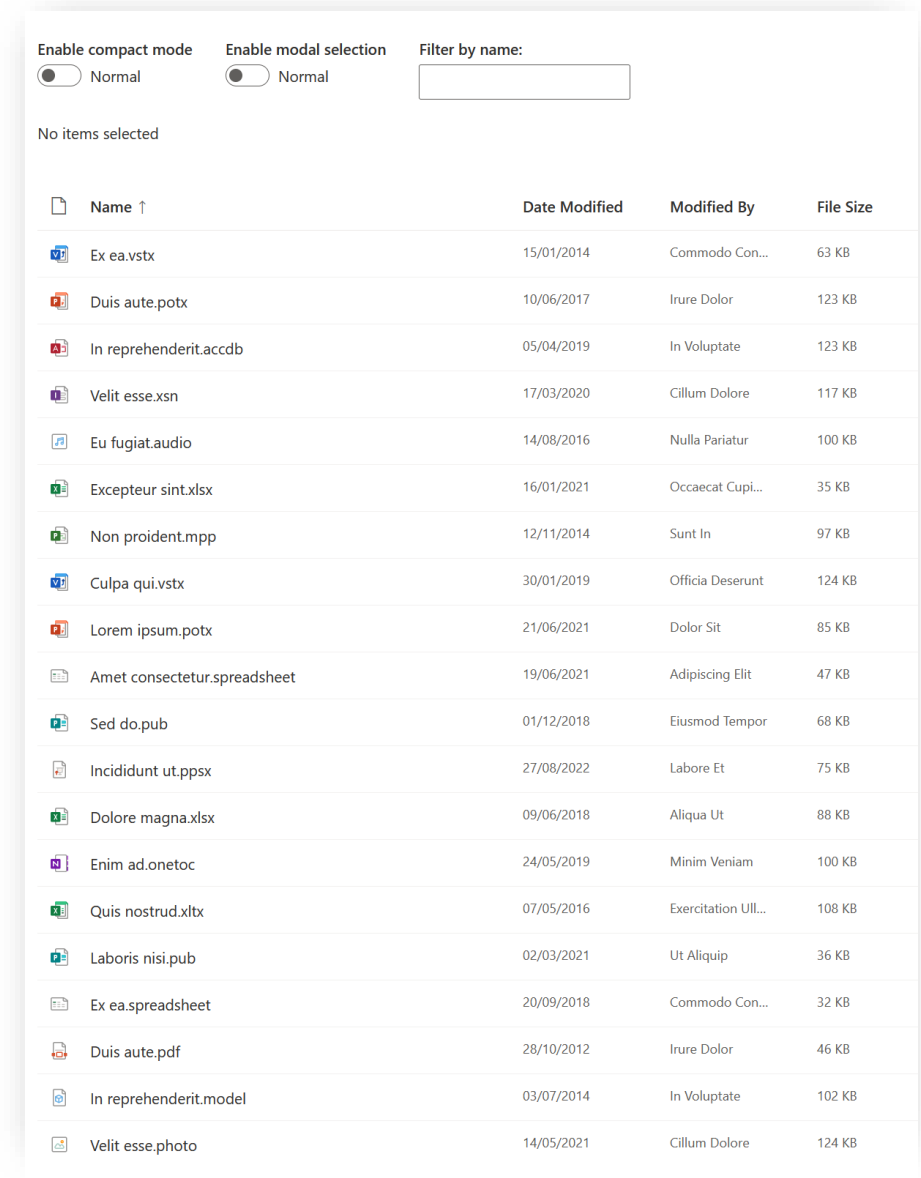

A collection of UX frameworks for creating beautiful, cross-platform apps that share code, design, and interaction behaviour.

Build for one platform or for all.

Fluent UI 7 currently ships with SPFx

Fluent UI 8 has 128+ components

[Fluent UI: https://developer.microsoft.com/en-us/fluentui](https://developer.microsoft.com/en-us/fluentui)

Installing the fluent ui components

```
npm i @fluentui/react-components
```

Optionally: `npm un office-ui-fabric-react`

```
es > react-fluentui-9 > {} package.json > ...
{
  "name": "react-fluentui-9",
  "version": "0.0.1",
  "private": true,
  "main": "lib/index.js",
  > Debug
  "scripts": {
    "build": "gulp bundle",
    "clean": "gulp clean",
    "test": "gulp test"
  },
  "dependencies": {
    "@fluentui/react-components": "^9.7.0",
    "@microsoft/sp-core-library": "1.15.2",

    "gulp": "4.0.2",
    "typescript": "4.5.5"
  }
}
```

Fluent Provider onInit

WebPart.ts

```
import { FluentProvider, FluentProviderProps, teamsDarkTheme, teamsLightTheme,
  webLightTheme, webDarkTheme, Theme
} from '@fluentui/react-components';
import { createv9Theme } from './shims/v9ThemeShim';

export enum AppMode {
  SharePoint, SharePointLocal, Teams, TeamsLocal, Office, OfficeLocal, Outlook, OutlookLocal
}

export default class FluentUi9DemoWebPart extends BaseClientSideWebPart<{}> {

  private isDarkTheme: boolean = false;
  private _appMode: AppMode = AppMode.SharePoint;
  private _theme: Theme = webLightTheme;

  protected async onInit(): Promise<void> {
    const _ = this.context.isServedFromLocalhost;
    if (!!this.context.sdks.microsoftTeams) {
      const teamsContext = await this.context.sdks.microsoftTeams.teamsJs.app.getContext();
      switch (teamsContext.app.host.name.toLowerCase()) {
        case 'teams': this._appMode = _ ? AppMode.TeamsLocal : AppMode.Teams; break;
        case 'office': this._appMode = _ ? AppMode.OfficeLocal : AppMode.Office; break;
        case 'outlook': this._appMode = _ ? AppMode.OutlookLocal : AppMode.Outlook; break;
        default: throw new Error('Unknown host');
      }
    } else this._appMode = _ ? AppMode.SharePointLocal : AppMode.SharePoint;
    return super.onInit();
  }
}
```

Fluent Provider render

WebPart.ts

```
public render(): void {  
  const element: React.ReactElement<IFluentUi9DemoProps> = React.createElement(  
    FluentUi9Demo,  
  
    isDarkTheme: this._isDarkTheme,  
    hasTeamsContext: !!this.context.sdks.microsoftTeams,  
    userDisplayName: this.context.pageContext.user.displayName,  
    context: this.context  
  );  
  
  //wrap the component with the Fluent UI 9 Provider.  
  const fluentElement: React.ReactElement<FluentProviderProps> = React.createElement(  
    FluentProvider,  
  
    theme : this._appMode === AppMode.Teams ||  
      this._appMode === AppMode.TeamsLocal ?  
        this._isDarkTheme ? teamsDarkTheme : teamsLightTheme :  
        this._isDarkTheme ? webDarkTheme : this._theme  
  ),  
  element  
);  
  
  ReactDOM.render(fluentElement, this.domElement);  
}
```

Fluent Provider Theme Change

WebPart.ts

```
protected onThemeChanged(currentTheme: IReadonlyTheme | undefined): void {  
  if (!currentTheme) return;  
  this._isDarkTheme = !!currentTheme.isInverted;  
  
  //if the app mode is sharepoint, adjust the fluent ui 9 web light theme to use the  
  sharepoint theme color, teams/dark mode should be fine on default  
  if (this._appMode === AppMode.SharePoint ||  
      this._appMode === AppMode.SharePointLocal) {  
    this._theme = createv9Theme(currentTheme, webLightTheme);  
  }  
}
```

Fluent Provider Createv9Theme

v9ThemeShim.ts

```
import { IPalette, ITheme as ThemeV8 } from '@microsoft/sp-component-base';

import { ColorTokens, Theme as ThemeV9, webLightTheme } from '@fluentui/react-components';
import { blackAlpha, whiteAlpha, grey } from './themeDuplicates';

/**
 * Creates v9 color tokens from a v8 palette.
 * https://github.com/microsoft/fluentui/blob/master/apps/public-docsite-
 * v9/src/shims/ThemeShim/v9ThemeShim.ts
 */
const mapAliasColors = (palette: Partial<IPalette>, inverted: boolean): ColorTokens => {
  ...
};

/**
 * Creates a v9 theme from a v8 theme.
 * You can optional pass a base v9 theme; otherwise webLightTheme is used.
 */
export const createv9Theme = (themeV8: ThemeV8, baseThemeV9?: ThemeV9): ThemeV9 => {
  const baseTheme = baseThemeV9 ?? webLightTheme;

  return {
    ...baseTheme,
    ...mapAliasColors(themeV8.palette, themeV8.isInverted)
  };
};
```

Components

FluentUi9Demo.tsx

```
import { Button, Link, Text, Tab, TabList, Avatar, useId, ToggleButton, Slider, Menu,
  MenuTrigger, MenuButtonProps, MenuPopover, MenuList, MenuItem, SplitButton, Divider,
  Label, Input, Checkbox, RadioGroup, Radio, Switch, Body1, Caption1
} from '@fluentui/react-components';
import { Card, CardHeader, CardPreview, CardFooter }
  from '@fluentui/react-components/unstable';
import { ... } from '@fluentui/react-icons';

<TabList onTabSelect={(e, data) => setTab(data.value)} defaultSelectedValue="buttons">
  <Tab value="buttons">Buttons</Tab>
  <Tab value="cards">Cards</Tab>
  <Tab value="inputs">Inputs</Tab>
</TabList>

<Divider appearance="brand">Button</Divider>
<div className={` ${styles.stackHoz} ${styles.spaceBetween}`}>
  <Button>Default</Button>
  <Button appearance="primary">Primary</Button>
  <Button appearance="outline">Outline</Button>
  <Button appearance="subtle">Subtle</Button>
  <Button appearance="transparent">Transparent</Button>
</div>
```

Stacks

Stacks currently do not exist in Fluent UI 9

You can use CSS to achieve the same results

```
.stack {  
  display: flex;  
  flex-direction: column;  
  flex-wrap: 'nowrap';  
  gap: 5px;  
  width: auto;  
}  
  
.stackHoz {  
  display: flex;  
  flex-direction: row;  
  flex-wrap: wrap;  
  gap: 5px;  
}  
  
.center {  
  align-items: center;  
  justify-content: center;  
}  
  
.stretch { align-items: stretch; }  
  
.spaceEven { justify-content: space-evenly; }  
  
.spaceAround { justify-content: space-around; }  
  
.spaceBetween { justify-content: space-between; }
```
