- UX/UI obsessed
- Active community contributor
- Blogger
- Avid gamer and dog mum

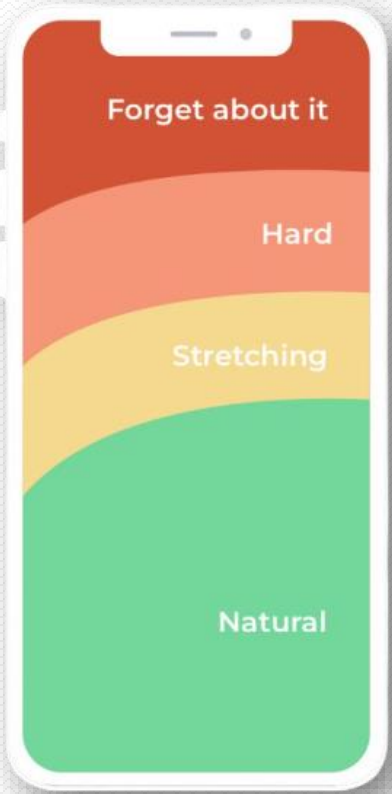

Principal Technical Consultant  
Computacenter  
London, UK

# Let's talk about the thumb zone

**Left hand**

**Right hand**

# Why is mobile navigation important?

## Accessibility

Make it easy for those using assistive features and software to navigate around your application

## User experience

Rapidly access key screens in your application

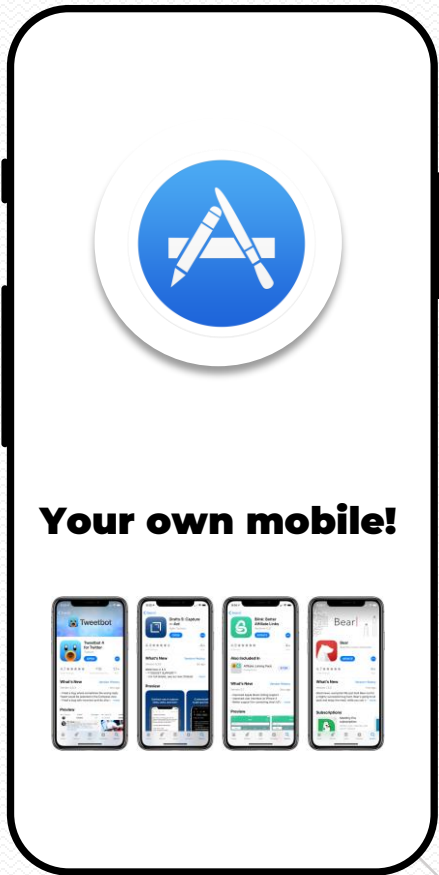

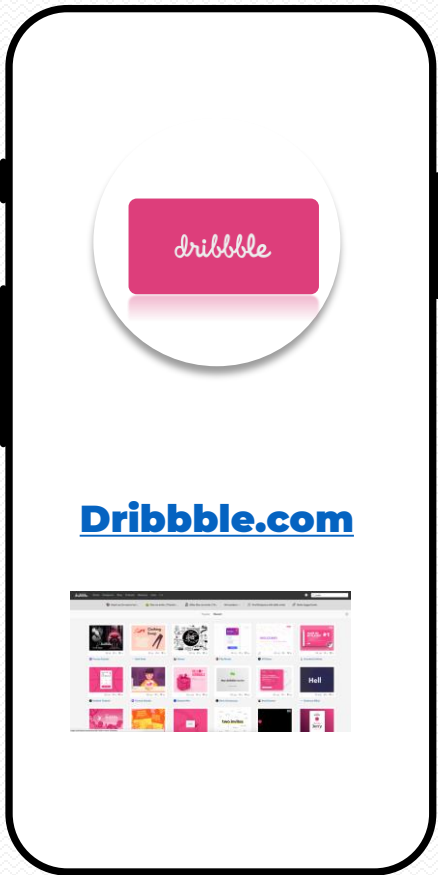

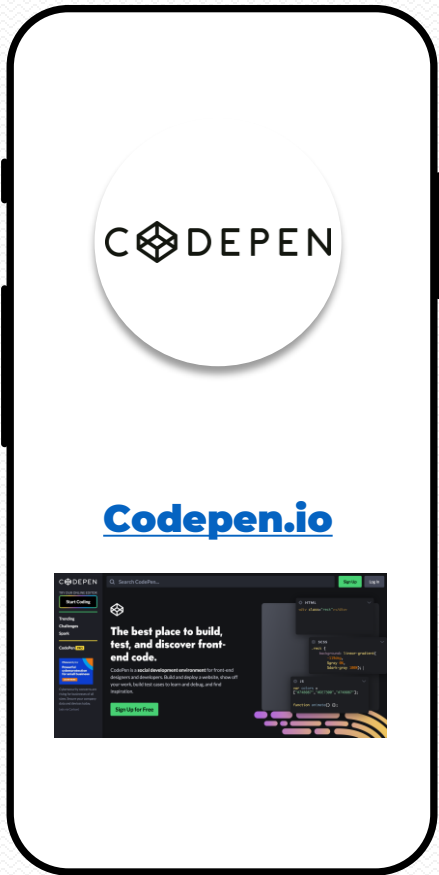

## It looks awesome!

And if it looks good... your users will LOVE your app!

‘But I’m not a UI designer...’

Get inspired!

**Demo time!**
