Creating Teams Adaptive Cards – Direct output

```
"type": "TextBlock",
"text": "Do you agree to the ultimate question of life, the universe, and everything?",
"wrap": true
},
{
  "type": "Input.ChoiceSet",
  "choices": [
    {
      "title": "Yes",
      "value": "Yes"
    },
    {
      "title": "No",
      "value": "No"
    },
    {
      "title": "Tell Deepthought to recalculate",
      "value": "Recalculate"
    }
  ],
  "placeholder": "Yes or No",
  "id": "Approval"
},
```

WITHIN YOUR JSON CODE, IT'S IMPORTANT TO MAKE SURE THE ID IS RECOGNIZABLE, SO YOU CAN USE THIS IN YOUR APP

Send an email (V2)

* To: Leenders - den Nijs, Nathalie

* Subject: test
