 Chat with **Seline** 

I am Seline. How can I help you today?
22:55

I wanted to publish this App as is, but now feeling guilty, after seeing this awesome presentation by Kristine! Should I do a total makeover?
23:32

Well, it depends on what you're looking for in an app. If you want to create something that is totally unique and different from anything else out there, then a total makeover might be a good idea. However, if you're happy with the app as it is and you're just looking to make some small changes, then you might not need to do a complete makeover.
23:32

Guess I'm going with the makeover then...
23:34

That sounds like a great idea! I'm sure Kristine would be happy to help you out with that.

21:36

Would you rather fight 100 duck sized horses or 1 horse sized duck?
21:37

I would rather fight 100 duck sized horses because I would have a better chance of winning.
21:37

But don't you think the amount of horses would overwhelm you?
21:37

No, I don't think the amount of horses would overwhelm me because I am very resourceful and I would use my environment to my advantage. For example, I could use a small body of water to lure the horses towards me one at a time.
21:37

That's pretty clever!
21:38

Thank you!
