PrimaryTextCard-MyShifts

ACE to show current logged in user's upcoming shifts based on selected team

<https://github.com/pnp/sp-dev-fx-aces/tree/main/samples/PrimaryTextCard-MyShifts>

Summary

- Display current logged in user's immediate Upcoming Shifts in card view
- Show all upcoming shifts in Quick View
- Configurable ACE based on User's preference(not admin)
- Shifts will be displayed from selected team
- Storing the User Preference settings in user's OneDrive
- Personalized Experienced in Viva Connection
- Configurable option to show Shift title or Date as label

Concepts Explored

- Exploring new Adaptive Card Extension
- Calling Graph API from ACE
- Using Microsoft Graph to store/read user's settings(preference) in application's personal folder of user's OneDrive
- Usage of multiple Quick Views
- Stage management between views
