# Microsoft 365 platform community call

May 10, 2022

Agenda

- Latest updates and news on the Microsoft 365 platform

- Monthly summary on Microsoft 365 Platform community contributors

- Group picture time with Together Mode!

- Demos
  - **Namrata Khubchandani** - Extend your Teams Search Based Message Extension to Outlook

  - **David Rousset** - Getting started on using Azure Communication Services in your web site

1 **Sample code for People picker in Tabs**

Tab people picker   Tab   About

People picker with members according to scope

To use this option, configure the function using following parameters

```
microsoftTeams.people.selectPeople(
callbackfunc,
setSelected: null,
openOrgWideSearchInChatOrChannel: false,
singleSelect: false)
```

Select

People picker with all members of the tenant

To use this option, configure the function using following parameters

```
microsoftTeams.people.selectPeople(
callbackfunc,
setSelected: null,
openOrgWideSearchInChatOrChannel: true,
singleSelect: false)
```

Select

People picker with single member select.

To use this option, configure the function using following parameters

```
microsoftTeams.people.selectPeople(
callbackfunc,
setSelected: null,
openOrgWideSearchInChatOrChannel: false,
singleSelect: true)
```

Select

People picker with defualt selected member

To use this option, configure the function using following parameters

```
microsoftTeams.people.selectPeople(
callbackfunc,
setSelected: aad id,
openOrgWideSearchInChatOrChannel: false,
singleSelect: true)
```

Select

Select people

Start typing a name or email address

Common reasons for app validation failure

Article • 04/28/2022 • 6 minutes to read • 1 contributor

Most apps don't pass store submission process due to issues during app development. The most common issues or reasons are addressed in this article to help you prepare your app better before submitting for review. Avoid these common failures and follow the Microsoft Teams store validation guidelines and Commercial Marketplace Certification policies to increase the likelihood of your app to pass the Microsoft Teams store submission process.

Following are the most common reasons for your app to get rejected:

Broken links and functional bugs   Errors in the app description   Violation of Microsoft Brand guidelines   Missing or incomplete test instructions   Incomplete Publisher Verification

App icon guidelines violation   App naming guidelines violation   Invalid support links   Manifest schema guidelines violation   App UI usability issues

Valid domain guidelines violation   Missing localization information   Developer name mismatch   Invalid privacy policy links   Invalid terms of use links

Broken links, functional bugs, app crashes, and unexpected errors

Test your app to verify your app's correctness, functionality, and usage. Ensure that you test your app
